HAROLD LLOYD in "SPEEDY"

HERE HE COMES!—the King of Comedy at his best! Harold Lloyd in his long waited new comedy is here at last to spread a broad smile all over YOUR TOWN. Lloyd and laughter are the team supreme. If you are a professional groucher, here's where you lose your reputation forever. THERE HE GOES!—straight into the heart of every picture fan in THISBURGH. You'll grin with a gurgling "Speedy" sets out to save old Pop Dillon from the villain and win the girl. He travels like the wind and there's no keeping up with the laughs. A joy-jerked, tickle tagged trip through entertainment town.

**This Week-- Emil Jannings in
"The Last Command"**

Coming Wed., Nov. 7th
"The Wandering Jew"

California Visitors Admire Alberta

Notable guests here last week were Mr. and Mrs. George D. Roalfe of Long Beach, Cal., who visited Mrs. Roalfe's parents, Mr. and Mrs. L. J. Adams, from Oct. 12th to 15th. Mr. Roalfe is representing the Knights of the Round Table, of which organization he is a member, and his present itinerary has included the large cities of the United States and Canada. He was much pleased with Canadian institutions and progress and sees a great future ahead of this country. He attended a meeting in Calgary and has many engagements in the near future, necessitating a brief visit here. Mrs. Roalfe, nee Miss D. Adams, met a number of old time friends while in Champion. They were accompanied as far as Calgary by Mr. and Mrs. Adams and W. Adams.

Store Will Be Closed Wed. and Thursday

Prior to the opening of the clearing sale on Friday, Nov. 2, Mrs. Therriault's store will be closed all day on Wednesday and Thursday, Oct. 31st and Nov. 1st.

Masquerade Dance Coming at Alston

A masquerade dance will be held in the Alston Community hall on Friday evening, Nov. 16th. Prizes will be given for best lady's and gentleman's costumes, and also for best lady's and gentleman's comic costumes. Music will be furnished by the Harmony Night Hawks' orchestra. This will be one of the big dancing events of the season and a special effort will be made to assure all who attend of a real time.

Positions Sought For Harvesters

With the object of encouraging the satisfactory assimilation of the numbers of British harvesters who will remain in Western Canada when the present threshing season is over, every effort is being made by Colonization and Land Settlement Offices and the Provincial Labour Bureaus to have these men placed as farm help throughout the province for the coming winter.

The main difficulty is to get in touch with the men who are prepared to remain in this country and to put them in touch with winter jobs before they lessen their chances of securing these jobs by leaving the districts in which they are at present working and congregating in the larger centres such as Calgary, Edmonton and Winnipeg. There is no advantage from the harvesters' point of view in coming to town as they only have to bear the expense of travelling back to a country point and their chance of securing work in the cities is very small. They stand a much better chance of securing work if they retain their present employment as long as it is available for them and in the meantime, secure work for the winter with the farmers with whom they are in daily contact. Failing this, they can receive the assistance of the officials of the Land Settlement Branch who are located at central points throughout the province to whom almost any farmer can direct them, or from their local station agent or the local employment office which organization has 200 voluntary agents throughout the province.

Wait for "Campbell's" first big sale. Starts Thursday, Nov. 1st.

Hallowe'en Dance Coming Event

Everyone should go to the Women's Institute Hallowe'en dance in Campbell's hall on Wednesday, Oct. 31st. This has always been a popular annual event and a special effort is being made to eclipse all former dances this year. The Johnny Anderson orchestra with Miss Blaine as pianist will provide the music.

Carmanagay Dance Big Success

The dance sponsored by the ladies of the Royal Purple of Champion, and held in the Carmanagay hall on Wednesday evening, October 24th, was an immense success, the gross receipts amounting to \$355.00. The music by Johnny Anderson's orchestra, the novelties, and the lunch served by the Carmanagay Women's Institute were notable features of the occasion. Harp, Sully and Chesholm were well represented among the guests.

Ladies' Aid Bazaar Coming Soon

The Ladies' Aid bazaar which will take place on Saturday, Nov. 24th, will be a particularly attractive event this year as the work, etc., to be offered will be above former years both in quality and quantity.

Bank of Commerce Reviews Markets

The trend of wholesale prices continued downward during the period from 15th August to 15th September, the index number as at these two dates being 91.78 and 90.81 respectively. More recently the grain market has shown increased activity and prices, especially for wheat, have risen. Other grains, with the exception of barley and corn, which are lower, remained unchanged, continued reports of a shortage in Central Europe apparently offsetting the estimated increase in production, both in Canada and the Northern Hemisphere as a whole.

The cattle markets have again strengthened and the present satisfactory condition of the Canadian beef cattle industry is expected to continue, largely as a result of the insistent demand from the United States, which, during the seven months ended July, took 53,339 head of cattle and 19,259,000 pounds of beef, as compared with 35,208 head and 17,112,600 pounds during the same period of 1927. The price of hogs has declined slightly, but as it is anticipated that supplies will be lighter volume and that domestic and foreign demand will show improvement the outlook continues favourable. Butter and cheese have both undergone a seasonal rise in price, with demand good and prices firm. Stocks of both these commodities as at 1st September show a considerable decrease from last year and from the five-year average. Hides have receded slightly from the high figure attained in the early summer. Canadian Bank of Commerce letter.

Mrs. C. E. Anderson entertained at afternoon tea on Friday last.

Ruby Graham

Teacher of Pianoforte and Theory
In Champion on Friday and Saturday of each week. Studio at the residence of Mrs. G. M. Campbell.
Pupils prepared for examination if desired.

Society Brand Clothes

This Suit has the new Tattersall Vest

Quite a change—to wear a vest which is actually interesting in itself—and not just a background for your favorite tie. The Tattersall—with its flap pockets, the distinctive waist seam, and its pleats which line up with the pleats in the trousers—is one of the smartest ideas of the year. And absolutely correct.

And now we are realizing a real Indian summer. This fall has been such a noticeable contrast to the weather experienced for the past three years that appreciation is easy. It is to be hoped present conditions will extend for a long period.

OXFORD CIRCUS SCENE OF UNUSUAL HAVOC FROM VIOLENT WINDS

London, Oct. 23.—Unroofed buildings, shattered glass and fallen masonry today marked the path of a miniature tornado which swept London last night with a violence rarely experienced in London. It had been raining steadily and was cloudy, but fairly calm when people were startled by a sudden roar and whirled helplessly around amid crashing glass and falling stones, tiles and bricks.

Oxford Circus and the neighboring streets were the centre of the storm's violence. In that neighborhood, parts of the roofs of several buildings were ripped off. Plate glass windows of the big shops were blown in. Goods and dressmakers' models, displayed in windows were whisked out into the street by the wind.

Passing buses reeled like ships on a stormy sea to the terror of passengers. Two of these huge autos were stopped and driven backwards by the force of the wind.

The wind lifted off a part of the roof of the labor exchange and dropped it into the street, which fortunately, had been almost emptied of people previously by the heavy rain. The glass dome of the college of music crashed to the alarm of the forty pupils who occupied injury. Signs hanging over the streets were torn off by the hundreds.

Having expended most of its fury in the Oxford circus neighborhood, the storm swept northward, smashing windows, hurling down signs and tiles over a path 200 yards wide.

Only two persons were injured. This small casualty list was attributed to the rain which had cleared the streets before the storm broke in all its fury.

REVENUE GREATER THAN WHOLE DEBT BEFORE GREAT WAR

Calgary, Oct. 18.—That the present revenue from customs excise and income tax in the Dominion totalled \$380,000,000, which represented more money than the whole of the national debt before the war, was the statement made on Thursday by

Hon. W. D. Euler, minister of customs, who is just now touring the West, inspecting the various branches of his department. Throughout the West, at Winnipeg, Saskatoon, Edmonton, Vancouver, and also in Calgary, there was, he said, a healthy business improvement. The most satisfactory feature was that this was the condition with all, which of course was particularly desirable.

The minister, in reply to a question, stated that the customs collections the last six months showed an increase of \$15,000,000. Income tax collections were up about \$5,000,000, even in face of the 10 per cent. reduction granted at the last session of parliament. They were now \$3,000,000 over the collections of last year and had a considerable time to go to the close of their fiscal year. The customs brought in last year, he said, about \$155,000,000, excise \$147,000,000, of which about \$80,000,000 was sales tax, and the income tax amounted to about \$77,000,000, and some smaller amounts brought up the total to \$380,000,000.

TORONTO PAPER SAYS FERGUSON SOON TO APPEAL TO THE VOTERS

Toronto, Oct. 20.—The Star today publishes the following:

"With a provincial general election next June practically a certainty, the cabinet of the Ontario government are quietly preparing plans for their election platform and legislation for the next session of the house to improve their chances of being returned to power."

"Cabinet ministers are making many speeches over a wide territory

and party organizers are frequent visitors to Queens Park. All this tends to make a political undercurrent that will break into full force when the election date is announced."

"Two important pieces of legislation have been promised the people of Ontario by Premier Ferguson. These include old age pensions and the act to protect real estate dealers. "Interest is centering around the real estate bill. Last year the 'blue sky law' was passed making it necessary for all stock brokers and salesmen to register with the government. The act will do the same for the dealers in land."

"While it is now reported that no amendments to the liquor control act will be brought down, it is understood that the government seriously contemplated introducing the 'padlock' system of dealing with law-breaking hotel keepers."

"This is not permissible under the act as it now stands. It is understood in good authority that this drastic step is no longer necessary."

ALBERTA CROP YIELD NOT UP TO THE EARLIER PREDICTIONS — DEPT. OF AGRICULTURE REPORT INDICATES MARKED DECREASE IN YIELD

Edmonton, Oct. 20.—Reports received by the department of agriculture for the fortnightly crop statement of the season, show the Alberta crop for 1928 is showing a very marked decrease in yield and reduction in grade as compared with the estimates made some weeks ago. Official reports to the department in all parts of the province show that the wheat crop will average approximately 20 bushels to the acre and they emphasize the fact that the injury to both the yield and quality of the crop from frost is more serious than was apparent from earlier reports. The experience of previous years is that subsequent returns will slightly reduce rather than increase the first figures as these represent a large proportion of grain from summerfallow. From a wheat acreage of 6,707,526 acres as shown of Dominion government estimates and on the basis of the average yield shown in these returns, Alberta's wheat crop will total 134,150,520 bushels. It is also apparent that as a result of the reduction in grade, a considerable percentage of this year's wheat will be retained for feed rather than shipped to market.

This conclusion as to the probable average yield over the entire province is borne out by information secured on Friday from the regular correspondents of the department and from other equally reliable sources. While the yield for the present season is somewhat disappointing, showing as it does a drop of some seven bushels per acre as compared with last year's phenomenal returns, it may be pointed out that the 1928 yield is still two bushels per acre in excess of the average for the past ten years. The situation with regard to the wheat crop applies to the coarse grains to almost the same extent. Oats throughout the province will average from 20 to 25 bushels per acre, barley from 20 to 25 and rye from 15 to 18 bushels.

Apart from the reduction of fully 25 per cent. from the estimates of the yield made in August, the value of Alberta's 1928 crop is greatly depreciated through the injury to quality resulting from the frost. While some sections have been more fortunate in this regard than others, grain inspectors indicate that not more than 25 per cent. of the wheat being marketed is of the contract grades and in many districts a large percentage of wheat is grading No. 6 and feed. This reduction in quality is also virtually the same in the case of oats and much apprehension is felt as to the seed supply for next year's crop.

In the Peace River country where the yield is lower than expected, the quality of the grain is somewhat better than the average for the province. In the southeastern section of the province both yield and quality of grain have been less seriously reduced than in other sections, although completion of threshing has been delayed by broken weather during the last week.

HEALTH AND BEAUTY

A healthy woman is always good to look at, even although she may have no particular claim to beauty. A clear skin, bright eyes, vital hair, and a well-set-up figure cannot fail to attract, and this can be obtained by guarding your health.

Doctors advise the daily drinking of at least six tumblers of water, one first thing in the morning, and one last thing at night. The water helps to cleanse out the system, leaving it thoroughly drained of all impurities.

The best foods to eat are green vegetables, fruit of all kinds, including oranges, lemons, and apples, eggs, milk, butter, fish, and wholemeal bread. In winter the daily diet should include fat in some form or another. Diet experts agree that meat is not a necessity. Fish is a good and sufficient substitute.

With the first chill winds of autumn many women insist on heating on extra clothes, but this is not the best way to avoid that shivery feeling. The clothing both for summer and winter should be sufficiently porous to enable free action of the skin to take place. Fifty years ago it was customary to wear six or seven undergarments, three or four of which were composed of flannel. To-day our clothing is much lighter and scantier, and everyone agrees that we are the healthier for it. The best plan is to wear light underclothing, and don heavier outer clothing when the weather is cold.

So that the skin can play its part in the right way, it is necessary to wash frequently. If the pores are allowed to get clogged up with dirt or perspiration little pimples will result. To avoid this, wash thoroughly first with warm water, and then rinse liberally with cold. It is not too often to bath every day, but hot baths should be taken just before going to bed.

For health literature write to the Red Cross Society, 407 Civic Block, Edmonton, Alta.

Many Try to Imitate- But They Cannot Duplicate

Because the wonderful washing principle of the Maytag Gyrofoam is Covered and Protected by Patents.

We feel proud of the Maytag, especially when salesmen who sell other good machines admit candidly that the Maytag Washer stands in a class by itself.

1. The heavy cast aluminum tub will last a lifetime.
2. It retains the heat for the entire washing.
3. It will not injure the finest fabrics.
4. The dirt settles to the bottom and is not churned up in your clothes.
5. Fastest Washer on the market. Washes clean in from 3 to 7 minutes.
6. Machine adjusted to your height.

7. New improved wringer and automatic drain.
8. New improved motor, easy to start and simple to adjust.
9. Takes up 25 square inches floor space—most compact Washer on the market.

We judge machines by performance. Ask the owner of a Maytag and let your good judgment rule your decision.

INSURGENTS AND TROOPS IN BATTLE IN MEXICO

Mexico City, Oct. 23.—Excelsior today printed a dispatch from Guadalajara saying that thirty insurgents, including two chieftains and one army officer and eight soldiers had been killed and two soldiers fatally wounded in a 13-hour combat at Autlan, state of Jalisco.

Federal Captain Ramos was notified that a group of men were committing robberies in the outskirts of the town and ordered 20 soldiers to round them up. The small detachment arrived at the scene of the robberies and was suddenly attacked by 300 insurgents.

The soldiers fought gallantly until the commanding officer and eight of them were killed and two others fatally wounded.

The insurgents then attacked the town. The battle raged for 13 hours until the insurgents were forced to withdraw, abandoning, thirty dead. Other dispatches today said that six insurgents and three soldiers were killed in another battle at Huapala.

WORLD HAPPENINGS BRIEFLY TOLD

Choked by a piece of carrot which lodged in his throat, John William Black, of Ogdensburg, N.Y., died in hospital at Prescott, Ont., Oct. 16.

E. W. Beatty, president of the Canadian Pacific Railway, recently celebrated his 51st birthday. Mr. Beatty was born in Thorold, Ont., on October 16, 1877.

Using nitro-glycerine, yegmen blow open the safe in the post office at St. John's, Nfld., and got away with about \$3,000 in cash.

Lord Birkenhead, secretary of state for India since 1924, has resigned from the Baldwin cabinet in order to follow commercial activities in London.

A trainload of 1,500 head of cattle owned by a group of ranchers from the Peace country, reached Edmonton recently over the Edmonton, Dunaville and British Columbia Railway.

A guarantee of tonnage, such as was given by the Flin Flon mine, is essential before a branch line is built to the Sherritt-Gordon mine in northern Manitoba, said Major Graham Bell, deputy minister of railways, in commenting on the project.

Lieut.-Col. A. L. Young, of Souris, Man., officer commanding the second reserve regiment, 12th Manitoba Dragoons, was elected president of the Canadian Cavalry Association for the incoming year at the concluding session of the 12th annual convention at St. John, N.B.

Whether the wheat pools of the west are liable to income taxation will be the subject of a big case to the exchequer court this fall. The matter has long been in dispute, and while the tax has been paid, it has been under dispute. The Saskatchewan Co-operative Company's case is to be made a test, the other pools in which will apply to the decision, says the Ottawa Citizen.

Medical Examination Of Settlers

Doctors To Be Appointed To Examine Intending Settlers At Point Of Origin

Arrangements are being made by the department of immigration to appoint approximately 500 doctors who will conduct examinations on intending settlers at the point of origin, thus eliminating any possibility of hardship in a settler presenting himself at seaboard and being turned down by the doctors at the ports, declared Hon. Robert Forke, minister of immigration, who had a conference with provincial officials on the question of immigration at Edmonton.

Japan's Traffic Problem

Traffic congestion has become no road in the streets of Osaka, Japan, that officials are contemplating use of the old canal. It is proposed to use boats propelled by outboard motors as a part of the municipal transportation system.

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is all, that, effective, yet harmless. It has been the standard antacid for 50 years among physicians and laymen. It is so mild and so effective that it is the only way to get the stomach back to normal. It is the only way to get the stomach back to normal. It is the only way to get the stomach back to normal.

Singapore's Huge Floating Dock

First Portion Has Completed Eight Thousand Mile Journey

After a four months' voyage from England, the first portion of the huge floating dock for the new British naval base arrived at Singapore, having completed a journey of 8,000 miles by way of the Suez Canal.

The Singapore dock, when completed, will be the largest floating dry dock in the world and large enough to hold any British warship weighing 10,000 tons and containing 20,000 tons of steel. It cost \$400,000.

The contract for completing the dockyard was awarded on September 27, and called for the building of the work by 1935. It is estimated that the naval part of the project will cost \$57,500,000.

NEW BEAUTY FOR YOUR CLOTHES

You can look attractive and show how to give new beauty and variety to your dress and to your individuality and charm to the eyes of the men by the quick magic of tinting and dyeing. Perfect results are possible only with Diamond Dye. Each package represents the perfect tinting and dyeing. They never streak, spot or run. They are real dyes, like those used when the cloth was made.

Diamond Dye is easy to use. The "know-how" is in the dyes. Fashionable colors, shades, tints, right over the out-of-style or faded colors. Instant on Diamond Dyes and save disappointment. "Color-Craft," my big new book of dyeing hints, will tell you all about it. Write Mac Martin, Diamond Dyes, Windsor, Ontario.

Soundings Will Be Continued In Spring

Progress Made In Survey Work On Great Slave Lake

Soundings of Great Slave Lake as an aid to navigation will be continued as soon as spring opens, according to H. L. Leeming, engineer of the hydrographic survey branch of the federal department of marine, who recently arrived at Edmonton from the far north. He has been in charge of operations in the vicinity of Fort Resolution during the past season, assisted by W. H. Young, of Winnipeg, and a crew of four men.

Commercial fishing offers great possibilities on Great Slave Lake, says Mr. Leeming, but he thinks that mining will also be necessary to support a population of any size. He also looks forward to considerable mining activity, and states that aeroplane carrying prospectors were often seen to pass over on the way down the Mackenzie River. With the providing of additional transportation for that country, he felt certain of a period of market expansion.

Millions Invested In Cars

Seventy-One Million Dollars Invested In Cars In Saskatchewan

Over \$71,000,000 has been invested in automobiles by the people of Saskatchewan. According to the Public Service Ministry, in 1928 for the eighth month a total of 113,694 cars was licensed by the department. In quotations from the Automobiles, 99,501; heavy cars, 835; trucks, 13,358.

Figuring one class of car at a valuation of \$600 each and the rest at only \$1,000 each, on the 1927 total of 104,609 motor vehicles licensed, this meant a grand total considerably in excess of \$71,000,000 invested by the people of Saskatchewan.

About 350,000 Londoners, of whom nearly 280,000 are women, are employed in hotels, restaurants and domestic service.

Flattering Neckline
The chic femininity of the mode is smartly expressed in simple dress of printed sheer velvet in combination with a delicate lace. The long-waisted bodice, showing the high-cut, combines with shirred upper edge of skirt, to create the dainty but high line. The shaped collar of V-neckline, that falls perfectly in the jacket effect, is flattering new fashion, and is made of georgette crepe, which is also used for tiered flounces of long light-fitting sleeves. Style No. 208 can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Elizabeth, crepe Roma or shirred plain velvet for afternoons. Crepe satin, tulle-trimmed crepe, wool crepe de chine are excellent fabrics to choose for serviceable wear in term price 25 cents, in stamps or coin (coin preferred). Wrap coin carefully.

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The a d d e strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum.

New Horse Class For Royal

Shows Canada is Still Interested In Horse-Breeding

Interest in horse-breeding is holding its own in Canada, in spite of the competition from mechanical transport, if one may judge by new classes added to the horse section at the Royal Winter Fair this year. In addition to the regular classes for Clydesdales, Percherons, Belgians, Slivers, Standard Breds, Thoroughbreds, Hackneys, French-Canadians, Half-blood Hunters or Saddle horses, and the draught horse and pony classes, a new class has been added for Suffolk, the well-known British heavy horse breed. As good light horses suitable for hunters, saddle horses and army remounts, are in keen demand, a class has been added for mares suitable as brood mares in the production of this type of horse. This class is open to mares, four years and over, owned in Canada, and vouches for being registered in the Canadian Hunter, Saddle and Light Horse Improvement Society. The mares will be judged on the basis of their qualification to produce high hunters, saddle horses and army remounts. The section for this class are for heavy weight mares, 1,250 pounds and over; middle weight mares, 1,150 pounds and under 1,250; and light weight mares, 1,050 pounds and under 1,150.

Recipes For This Week
(By Betty Barclay)

ECONOMICAL PUDDING
2 cups milk,
1/2 teaspoon salt,
1 teaspoon vanilla,
2 tablespoons rice,
1 cup sugar,
1 cup raisins.
Wash rice thoroughly and drain; place in a buttered pudding dish and pour in milk. Bake in a slow oven for about 3 1/2 hours, stirring occasionally; add remaining ingredients and bake from 1/2 to 1 hour without stirring.

UNUSUAL SWEET PICKLE

4 oranges,
2 cups sugar,
1-1/2 cups vinegar,
1 teaspoon cloves,
1 teaspoon stick cinnamon.

Peel oranges, removing all white membrane with peeler; cut into thick slices; steam until tender and translucent. Boil sugar, vinegar and spices tied in muslin for twenty-five minutes. Add sugar, and put in pieces of orange, or simmer slowly, on back of stove, for one hour. Place in glass jar, and let stand a week or two to ripen, before using.

Practicality Of Faith

True faith is not a theory; it is actually. It is a principle that is applied constantly in the practical problems of life. It brings immediate results. One dollar saved is an actual, not theoretical, step forward.

It is never too late to learn; never too late to seek knowledge. One of the finest epitaphs ever placed on the grave of John Richard Green, the famous historian. It said "He Died Learning."

The wife: "This paper says that in parts of the East a good wife is often said to be a 'good wife' Her Hubby: 'Well, a good wife is her husband's shining light, isn't she?'"

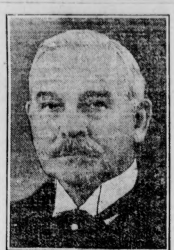

BABY GIRL HAD DIARRHEA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gulf Lake, Ark., writes: "Last summer, my baby girl was cutting teeth and became very restless. I tried all the remedies I could find, but the diarrhea did not stop. I was just about to give up when I saw an advertisement for Dr. Williams' Pink Pills. I bought a box and gave her a few. In a few days the diarrhea stopped and she was as good as new. I have not heard of any other cases of diarrhea in my family since."

Dr. Williams' Pink Pills for Pale People. A small box of 27 tablets, 25 cents. Put up only by The T. M. Wilson Co., Limited, Toronto, Ont.

DEFFOWLE'S EXT.-OF WILD STRAWBERRY

Why I wouldn't be without it where there are children. "My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhea and was as good as new. I have not heard of any other cases of diarrhea in my family since."

W. A. BLACK,

Director, Canadian Pacific Railway, William Allan Black, Director of the Canadian Pacific Railway, and President of the Ogilvie Flour Mills, was born in Montreal in 1862, the son of Charles H. Black, and was educated in Montreal Public Schools. He was with the traffic department of the Grand Trunk Railway from 1879 to 1882, in Montreal, and with the traffic department of the Canadian Pacific Railway in Winnipeg, from 1882 to 1884, at which latter date he joined the Ogilvie Flour Mills. In 1887 he was appointed Secretary, in 1902 General Manager of Western division, in 1910 he was elected director, and in 1911 General Manager of the entire corporation, and the following year Vice-President and Managing Director. He has since succeeded the late Mr. C. R. Hoerner as President. He was President of the Montreal Board of Trade during 1918-19.

SUNDAY SCHOOL LESSON

OCTOBER 28

PAUL'S LAST JOURNEY TO JERUSALEM

Golden Text: "Remember the words of the Lord Jesus, that He Himself said, 'It is more blessed to give than to receive.'"—Acts 20:35.
Lesson: Acts 20:1-21:17; 2 Corinthians 11:25.
Devotional Reading: John 10:17-18.

Explanations and Comments

Paul Reviews His Ministry Among the Ephesians, Acts 20:17-21. Paul had sailed past Ephesus, for he could not take the time to stop there or elsewhere in the province of Asia, as when he reached Miletus he sent a messenger to the elders or presbyters, Rev. Vernon, at Ephesus, bidding them come to Miletus to say farewell. In the church he founded Paul had established the offices of deacons and elders after the model of the Jewish synagogue. Paul preached sometimes of elders and sometimes of bishops using the latter term, which means literally overseers, or superintendents, in churches where there was a large Gentile element.

You yourselves know, from the first day that I set foot in Asia, after what manner I was with you all the time.—Thus Paul began his address to the Ephesian elders upon their arrival. The first day that Paul set foot in Ephesus he is recorded in Acts 18:7, but his first preaching there was later, about 18:19. He came to Ephesus again on his last missionary journey, Acts 19. "The manner of his life" he proceeds to tell in the next three verses.

Paul first reminded them how faithfully and how humbly he had served, and how he had lived with them in love while he was with them and his own life was threatened by the plots of the Jews' elders upon their arrival. The first day that Paul set foot in Ephesus he is recorded in Acts 18:7, but his first preaching there was later, about 18:19. He came to Ephesus again on his last missionary journey, Acts 19. "The manner of his life" he proceeds to tell in the next three verses.

Nothing Else But

A well-known comedian is very proud of his three beautiful and talented daughters.

One day an acquaintance and admirer of the comedian was talking to him about the family.

"A funny thing," he remarked, "you have nothing but those three girls."

The comedian looked at his friend in astonishment.

"Nothing but girls!" he echoed. "Why, my dear old chap, I wish you were right. As it is, we're nothing but boys all over the place."

State Forecaster Of Storm

There is a relationship between storms and storms. There are storms, it is true, that are accompanied by little or no static. There are other storms, accompanied by static, which are nevertheless difficult to locate because the static appears to come from no definite direction. But as a rule static accompanies a storm and gives in advance of the arrival of the storm definite indication of the direction of approach.

A Remarkable Magnet

Steel Alloy Takes Thirty Times Its Own Weight

A new steel alloy possessing remarkable power of magnetization has been discovered by a research engineer. It is cobalt steel alloyed with tungsten, and in the form of a horseshoe magnet it is claimed that it will raise a bar thirty times its own weight. Spectators at a recent demonstration were amazed to see a bar of alloy floating in the air. The explanation lay in a similar bar placed beneath the floating one. Magnetized by the poles opposite, the two bars were kept apart by the magnetic repulsion between them and as the repulsion was greater than the force of gravity, the upper bar floated.

HAS PLAN TO AID PRODUCTIVITY OF WESTERN SOIL

Toronto.—The rehabilitation of the soil of the western provinces through the use of nitrate fertilizer developed by electricity, possibly in Manitoba, is envisaged by Prof. J. Watson, head of the Chemical Engineering branch of the faculty of applied sciences, University of Toronto.

Addressing the Toronto Electric Club, Prof. Watson said that by passing the component parts of water and electricity through a simple chemical process, ammonium nitrate, the best and most concentrated fertilizer known, could be produced in unlimited quantities. By the fusion of rock phosphate and coke, a compound of phosphorus used in the fertilizing process would result.

"I believe," he said, "that in many years past we will have to supply fertilizer to the west. They have been 'mining' the ground there in the production of wheat and they may, to show how important fertilizers are to Canada, it is not uncommon to produce forty bushels of wheat to the acre. In Ontario the average production is twelve bushels."

Before many years, Prof. Watson believed, a great plant would be installed in some of the northern rivers, running into Hudson Bay, where electric power could be developed. Water would be taken from the river to bring its hydrogen content and nitrogen would be removed from the air. The two could be united to form the great basic element of plant food. He was of the opinion rock phosphate could be found in the same area and that coke could be freighted in to complete the manufacture of phosphorus in the electric furnaces which would derive their heating power from the harnessed waters of the river.

In both processes, Prof. Watson believed, electricity would be used for the heat necessary in breaking up the elements of the mediums used. "It will be a contribution to electric engineering," he said. "It is a field in which we can join hands to produce for the benefit of the country at large."

Arms Plea a Failure

German Communists Did Not Secure Enough Signatures To Petition

Berlin.—An attempt by Communists to hold a nation-wide plebiscite on a law proposed by them, whereby "it is forbidden to build a battle cruiser of any kind" has failed.

About 2,000,000 Germans signed the Communist petition for a plebiscite on the subject. The constitution prescribes that one-tenth of the qualified voters, or about 1,000,000 persons, must sign a demand for a referendum and therefore no plebiscite will be held.

C.P.E. Head Celebrates Birthday

Montreal.—E. W. Beatty, president of the Canadian Pacific Railway, has celebrated his 51st birthday. Mr. Beatty was born in Thorold, Ont., on October 10, 1877. He entered the service of the company of which he is now chairman and president in 1901, as assistant to the general counsel, and in 1910, became vice-president, and in 1918, president, succeeding to the post made vacant by the death of Lord Shaughnessy.

Sentenced To Three Years

Weyburn, Sask.—Anton Jost, young Hungarian, of Pangman, was sentenced to three years in penitentiary when a jury found him guilty of attempting to murder Mrs. Kaufman and Martin Kaufman. The jury found that Jost was not guilty of wounding Annie Kaufman with intent to murder or to do her harm.

Naval Papers Recovered

London, Eng.—Newspaper reports of the loss of naval documents "of very great importance" between Mackenzie-Bathurst and Sir Charles Royal naval barracks have proved an exaggeration. "It was learned at the Admiralty that the papers in question were of no importance and have been recovered."

Appeal Not Withdrawn

Toronto, Ont.—Hating their epithet he nor Mr. Wilson had sanctioned the withdrawal of the appeal, W. T. J. Brown stated that his and Wilson's appeal against the verdict of the trial jury at Colborne, in the libel action brought by Sir Arthur Currie, was being replaced on the list for hearing.

Heroism At Sea

Harrowing Tale Of Fire Aboard Ship Is Related

Vancouver.—With seven of her crew painfully burned and scalded, the Blue Star Line steamer "Trojan" Capt. G. A. Gelliford, arrived here with a harrowing story of fire on board while the vessel was off the California coast on the night of October 12.

William P. Tension, Hull, Eng., fireman aboard the ship, was burned, scalded and his body badly hurt. The fire broke out at 6:20 p.m. on October 12, when an oil-jet burst in the stokehold, trapping eight men of the engine room force in a wall of flame that sprang up in an instant.

Second Engineer Sydney P. Houston and Fireman James, according to the ship's officers, were chiefly responsible for the safety of the engine room crew.

Seeing that the way to safety on deck was barred, Houston led the men into the bilges under the boiler. The flames roared there and for three hours and thirty minutes they lay there in oil and water with the plates growing hotter and the water becoming more and more scalding. The boiler, however, was temporarily insane from the heat and rumbled back to the engine room again, where it flamed.

Only an act of providence stopped the flames. A big steam pipe in the stokehold burst, pouring a dense cloud of steam into the compartment, finally smothering the fire and permitting the deck crew to reach the imprisoned engine room crew, who were smothered from head to foot with fuel oil, soaked in water, blistered and partly gassed.

They are all recovering.

Radio Station Opened

Canada's Largest Broadcasting Station Now Operating At Winnipeg

Winnipeg, Man.—Official opening of the new broadcasting station of the Manitoba Telephone System, Ltd., is being held in the city today.

Hon. W. R. Clubb, Minister of Telephones, pressed a button which immediately set in operation the big 5,000-20,000 watt transmitter situated at the Agricultural College, eight miles distant.

The power of the new station is more than twenty times that of the present station.

The program included an address by Premier John Bracken and a band concert by the Winnipeg Salvation Army Band, under the direction of Bandmaster H. G. Merritt. The official wave length of the station will be 384.4 metres and 200 kilocycles.

Wins Mayoralty Contest

W. H. Malkin Is Elected Mayor Of Greater Vancouver

Vancouver.—With a majority of 1,666 votes, W. H. Malkin, pioneer wholesale merchant, was elected first mayor of the amalgamated city of Greater Vancouver, comprising Vancouver City, Point Grey, and South Vancouver municipalities, in the civic elections. Mr. Malkin defeated Mayor Louis D. Taylor, six years chief magistrate of Vancouver.

The vote in the thirty-nine polls was: Malkin, 15,732; Taylor, 4,067. Louis Rubinstein, another mayoralty candidate was never a factor in the contest. He polled but 207 votes. Mr. Malkin's term of office will be two years.

Pass Radio Exams

Western Candidates Obtained Certificates Of Proficiency In Radio Telegraphy

Ottawa.—The radio branch of the Department of Marine and Fisheries announced that 18 candidates were examined during the month of September. The following Western candidates were successful and obtained certificates of proficiency in radio telegraphy: Commercial, first-class—M. E. D. Jacobson, and J. H. Row, of Vancouver.

The following have been further examined and have had their existing certificates endorsed for additional equipment:—C. Blacklock, Vancouver; A. R. Beck and W. J. Pickering, Regina, Sask.

Liquor Revenue Help

Toronto.—The Evening Telegram says that only the sale of \$8,000,000 worth of liquor has saved the Ontario government from facing a deficit on the year's operations, and that a considerable portion of the liquor revenue will go to balance the expected \$25,000,000 shrinkage in the succession duties taxes.

Workman Buried In Concrete

Two Men Victims Of Accident At Cleveland

Cleveland, Ohio.—The bodies of two workmen who were buried alive in a 105 foot hole under a fifty ton fall of fresh cement at the Union Depot here, were cut from the hardened mixture after a desperate 12-hour struggle.

The two men were Patrick Tolin, 20, and Patrick Cleary, 27, both of Cleveland.

Tolin and Cleary were working at the bottom of the hole in which concrete was to be poured. A few feet away was another pit into which concrete had been poured a short time before.

Under the pressure of the tons of concrete, the retaining walls of the second gully gave way. The concrete tore through four feet of earth and poured down over the two victims.

LOOK FOR BIG GOLD RUSH IN NORTH ONTARIO

Winnipeg, Man.—Valuable gold discoveries made during the past summer and this fall at Crocus River by the Northern Alberta Mineral Exploration Company probably will bring a stampede of prospectors rivaling that to Bod Lake a few years ago.

At least 200 prospectors are awaiting their chances to make Crocus River before the freeze-up, and scores are intending to be there in the dead of winter. The more fortunate will go by airplane, but the majority will take the next best means of getting to their destination—by canoe or dog team.

"We have every proof that the Crocus Lake strike is a good one," Capt. Oakes stated. "Our groundmen, including engineers and other technical experts will be on the scene, possibly the entire winter."

The company will continue to carry on operations this winter by plane, although this branch of its service will not function in any other territory but Ontario.

The machines have been brought to Winnipeg for housing during the winter, and four more Fokkers and Fairchild will be flown here by the end of the week.

Captain Oakes and Al Chessman, chief pilot, brought two of them here the beginning of the week. The plane that sunk at Churchill Inlet on the Hudson Bay recently has been salvaged and will be shipped here about another month. It will have to remain at Churchill until freeze-up as the only means of transportation to the railway is by tractor. The crew will come also.

All planes which operate this winter would be equipped with skis.

Captain Oakes said, as there would not be facilities for machines with wheels.

TO ENCOURAGE SETTLEMENT

Assistant Commissioner, Department of Colonization and Development, Canadian Pacific Railway

London, Ont.—The newly organized Colonization Finance Corporation of Canada Limited is the most important step ever taken jointly by Canadian private land-owning bodies in the effort to encourage agricultural settlement on a sound basis. Millions of acres are involved and the scheme is being developed in conjunction with the Canadian Colonization Association, of which Mr. Macalister is a director.

Mr. and Mrs. Tunney Reported To Have Leased House In London

London, Mr. and Mrs. James Joseph Tunney, according to report have taken the lease for a year of a house in the Mayfair quarter of London where after their honeymoon it is said they intend to form a literary salon.

Harry Preston, English sportsman and friend of the retired world heavy weight champion, states that he still expects to see Gene enter the ring again.

He said that he had told Tunney that there remained one ring fight in his mind to break, referring to the occasion three years ago when Jack Dempsey fought four English heavy weights in succession at a boxing tournament.

Memorial Day For Celebrated Explorer

Norwegian Government Will Honor Memory Of Roald Amundsen

Oslo, Norway.—The anniversary of the discovery of the South Pole by Roald Amundsen, in 1911, will be celebrated on December 14, by the Norwegian government as a memorial day for the famous explorer who died in an effort to bring relief to the lost expedition of General Nobile.

Besides the extensive celebration in Norway, Norwegian all over the world will be informed of their government's decision to enable them arrange other commemorations.

High Commissioner From Britain

Edmonton.—Closer co-operation between the Provincial and Dominion Governments in regard to future immigration was decided upon at a conference held between Hon. Robert Forke, Federal Minister of Immigration and Colonization, and Premier Brownlie and members of his cabinet.

There will probably result from the conference in the way of definite forward moves, an agreement to bring out next year a number of British women for domestic help.

The establishment of training schools in the old country for prospective emigrants to Canada, and the erection of 20 or more cottages in the Leithbridge irrigation district for newly arrived settlers.

All the new policies thus tentatively decided upon will be of a triple nature, as between the Alberta, Dominion and British governments.

The cost of the various projects will be shared by the three parties, which will in this way be closely linked together in the promotion of selected British immigration to this province.

According to Mr. Forke's information, a considerable number of British women immigrants can be secured as domestic help and it is proposed to give this phase of the question some definite trial during the coming year.

The training schools in England also proposed as a matter of future policy will be established in both England and Scotland. They will be for the purpose of familiarizing British immigrants to Canada with actual living and farming conditions in this country and will be closely supervised.

A great deal can be done in this way, in Mr. Forke's opinion, to give prospective settlers a measure of experience and so to ensure their ultimate success.

The Provincial Government will now consider as part of its future program the building of 20 cottages on Leithbridge irrigated farms in which farmers newly brought out under the tripartite scheme may be settled.

This will be with a view of getting regulated flow of settlement, Mr. Forke said, was part of his itinerary on a Western tour in which he is coming with all the provincial governments.

New Daily For The Pas

Expected Publication Will Start Early In December

Calgary.—It is expected that the Northern Star, the proposed new daily for The Pas, for which a Canadian Press franchise has been granted, will commence publication early in December. A building is now in course of construction there to house the editorial, business and printing departments. G. M. Bell, president of the Calgary Alberta Company, is president of the new company, which will be the Winnipeg Tribune, the enterprise, and S. L. Cross, Regina, is vice-president. Associated with them will be P. C. Gahrnath, at present news editor of the Winnipeg Tribune, as business manager, and Fred Johnson, mining editor of the Winnipeg Tribune, as managing editor.

B.C. Settlement Plan Has Been Exaggerated

Reports Being Circulated Are Causing Government Some Trouble

Victoria, B.C.—Letters are pouring into the Government offices here from people who would avail themselves of the Premier's offer recently announced by Premier Tomin. However, many reports concerning how far British Columbia will go to aid the settlers have been exaggerated, and these are causing trouble.

Some reports state that the government would give 40 acres of cleared land, a log cabin and \$2,000 in cash, but the Premier denied this in a statement issued.

Premier Attends Luncheon

Speaks To Delegates Of Empire Parliamentary Association On Return To London

London, Eng.—Premier Mackenzie King, of Canada, attended the luncheon given by the British Government to the delegates of the Empire Parliamentary Association who have just returned from their tour of Canada, and are about to depart, many of them to return to distant parts of the Empire.

Premier King said he was sure the delegation while in Canada had learned how Canadians had the greatest possible pride in British traditions and institutions.

Alberta Plans To Aid Settlers From Britain

Offered Appointment

Sir Lomer Gouin May Accept Lieutenant-Governorship Of Quebec

Ottawa.—The Civilian publishes the following: "Although he has not officially accepted it, is expected here that Sir Lomer Gouin will respond to the offer of the lieutenant-governorship of Quebec when the vacant post next January on the expiration of the term of Governor Perreault. Many months ago the prime minister had suggested to the lieutenant-governor of justice, expressing the view that he should round off his career by accepting the lieutenant-governorship of the province."

Typhus In The Ukraine

London, Eng.—An Exchange Telegram states from Kiev, that about 10,000 cases of typhus in the Ukraine, with many deaths. Schools and moving picture houses were needed urgently, the despatch said.

Returns To California

Beverly Hills, Cal.—Jessie Clark, sister of Stanford Clark, 15-year-old actor of her uncle, Gordon Stewart, alleged killer of boys on his Riverside chicken ranch, has arrived here from Canada.

House Shortage In Calgary

Calgary, Alta.—Although 200 new houses have been erected in Calgary this year, a serious shortage is reported. The population of the city is estimated to have increased by 600 over last year on re-opening.

Air Flares a Success

London, Eng.—The Cross Channel Air Company announced that successful experiments had been made whereby passengers guided their city searchlight by means of a telephone while flying at an altitude of 12,000 feet.

Radio Popular In China

Peking.—The Peking radio broadcast station announced that it now has 2,620 paid subscribers, gained in less than one year. Three women announcers are on the staff of the station.

Coal Tar, from which dyes are made, is the essence of the plan that flourished thirteen years ago.

FINE TRIBUTE IS PAID TO CANADA BY U. S. JUDGE

New York.—"The country in which you were born is rapidly coming of age; you have no reason to be ashamed of it, and I commend you to its finest of all, the greatest country of your adoption."

These were the closing words addressed by the Hon. Justice E. Pollock, Surveyor, to the semi-annual gathering of the Canadian Society in New York recently.

Justice Surveyor spoke to a distinguished group which included Sir John Gloster Armstrong, British consul general at New York, and Mr. Frederick Huld, the Canadian trade commissioner here. His address was a survey of Canadian progress toward autonomy and nationhood.

The effect of this change, he said, is to bring Canada closer to Britain than ever. The Canadians would be proud of their fidelity to the British crown.

Justice Surveyor sketched the gradual accession to Canada of broadened jurisdiction in her courts of law and increase in her powers in dealing with other nations of the world.

"Canada's election to the council of the League of Nations," he said, "removed all doubt as to the place it will be able to take."

It Will Be Responsible To Canadian Doctor

British Doctors To Aid In Inspection Of Emigrants

London, Eng.—A roster of 350 British doctors working formally for medical inspection of emigrants to Canada, Canadian doctors will be retained, each doctor being in charge of a zone and British doctors within each zone will be responsible to the Canadian doctor, Miss Franklin, secretary of the British Overseas Settlement Society, whose society will welcome establishment of domestic training schools for women migrating to Canada.

Sir George Magnum, Church of England canon for Empire Settlement, says domestic training schools will be a great benefit to the migration movement.

This photographic portrait of Sir William Clark, first high commissioner of Great Britain to Canada, was made this summer in London, by Missa Keene, Fellow of the Royal Photographic Society. Mrs. Keene, who lives in Oakville, has done photographic portraits of many distinguished people in America, Europe and Africa, and has also made photographic studies of national types in many parts of the world.

CHAPTER IV.—Continued.

In appearance the champion very much resembled an ape. His bullet-head was close cropped. The small piggy eyes were deep set under overhanging, beetling brows, and the nose was flat like a negro's. His lips were thick, with a repulsive twist that gave his face a sinister look. His massive jaw was purposely bent unarched to rasp the tender skin of his opponent's shoulders in the clinches. His enormous barrel-shaped chest was covered with a thick growth of hair. His shoulders were broad and his disproportionate long arms, heavily muscled, terminated in two thick ham-like hands. He gazed confidently at Donald's corner.

A postcard box containing the gloves was tossed to the centre of the ring. There was a stir as the announcer pushed his way through the ropes. Andy crossed the ring to examine the champion's hands for tape and to test through the new gloves for any trace of sewed in shot or toxin that would cause the eyes smart. One of Garrietta's seconds was making a similar examination in Donald's corner.

A big mark in a wide-brimmed hat, with a mackinac coat over his arm, came walking down the steps of the arena. The look of astonishment on his face gradually gave place to one of joy. He ran to the ring.

"Donald!" he shouted joyously, as he sprang through the ropes. With a thrill of pleasure Donald held out his hand to Jack Gills. The big man's face was beaming. "Just got in," he said, "Bin lookin' all over town for you! I come to the fight and—boly kacker!—here you are one of the fighters!"

Andy noted the glad look in Donald's eyes and he spoke sharply to Donald's seconds, who were for ordering the belated starter out of the ring. The word "psychology" was foreign to Andy, but he knew that Donald's mind had for a moment drifted away from the fight. Donald was surprised to see Douglas greet Gills warmly as the big man left the ring.

"I have two good friends in the audience, anyway," whispered Donald to himself.

Andy leaned over him, talking in a low voice, giving him comfort and

advice. "E'll try right along, Donnie, to get your goat by cursing and using vile language, but don't listen, and don't lose your temper. E' nights, with 'is chin tucked in, 'is 'ollow of 'is left shoulder and 'is neck muscles rigid, 'is mighty 'ard to land on 'is jaw with a right. Now 'is first round, Andy went on, 'you just jab 'im light with your left: don't 'it 'ard, just a good snappy punch. E'll think you 'ave no strength in it, and the next round 'il get careless and let you 'it 'im so's to get a 'ole. Of course, 'il you 'ave a good opening, let fly with all you 'ave, but 'e won't open up until 'e tries you out a bit. Watch the dirty bludge in the clinches; 'e'll foul you, if 'e gets a chance. Another thing: this is to be twenty rounds, so take your time. Now is everything clear to you, Donnie?"

"Yes, Andy."

Andy patted Donald's bare shoulder affectionately.

The contestants stood in their corners as they were introduced. The referee, a stout, balding man, gave out of the ring for instructions. As Donald slipped the enveloping bathrobe from his shoulders and stepped forward, a murmur of admiration swelled from the crowd. His lean limbs and broad shoulders showed to advantage in the bright light. The long, flowing muscles rippled under his skin when he moved, like those of a panther. Loud applause came from all over the arena. Garrietta, thinking the evasion was for himself, turned and ducked his head with a look of intense interest.

"A rough voice near the top shout-out: 'Aw! that wasn't for you, you big stiff!'"

The judge and the dentist turned and looked at each other. The eyes of the latter seemed to say, "I told you so." The judge mumbled and nodded.

A fat man, who could not have been more than thirty-five years of age, with a head of fat on his waist-line, a bulbous nose and florid face, sat sagely on a big cigar. "By gad," he ejaculated, "that's the perfect." There was a look of admiration and envy in his red-rimmed eyes. Thus do men admire the strong, well-knit body of the athlete, even though their own physical self has degenerated to mere paste.

"Two to one that Garrietta won in 'is ten rounds," shouted a voice. Douglas covered the bet at once.

"Now, n'er," instructed the referee, "this is to be for twenty rounds. You are to fight clean breaks. You can hit with one arm free, but you cannot hold with one and hit with the other. When I say 'Break' I want you to break at once and stop back. Do you understand your 'Code? Good! To your corners!"

Donald glanced at his friends, who sat with their eyes upon him. He felt Andy's hand upon him gently and he knew that he would not suppress the trembling in his limbs.

"Everything's all right, Donnie," whispered Andy softly.

The going rang. Garrietta assumed the crouch Andy had predicted, his chin resting in the strong, well-knit body of the athlete, retreat into his skin under the overhanging brows. This was the champion's famous "fighting face."

"Pretty boy and yet," he scolded, "I'm goin' to knock dose pretty teeth over your throat, you—!" he cursed.

Donald snapped a light left to the ugly face and danced out of range. The champion's thick lips parted in a fensh grin. "My mamma's nice boy has a terrible punch!" he declared.

Donald continued his dazzling footwork, keeping the champion in pursuit and contending himself with casual left-hand jabs that kept his opponent's head reeling. He shot glances at intervals to his corner for instructions from Andy, who nodded his head in approval of his tactics.

The round finished in the challenger's favour by a wide margin on points. The champion had not landed a single effective blow during the round.

The action of the first round caused Donald to forget his nervousness. Andy crowded between his knees and gently massaged his body, the while speaking words of commendation and counsel.

"Now that you find that you can reach 'im easily with your left, watch me for awhile. If I see that 'is opens' up, I'll give you the sign to shoot your left with all you 'ave. If he swings again with 'is left, try for 'is broad basket. You understand me, Donnie?"

"Easiest thing I've picked yet," chuckled the champion as he came to his corner.

"He may be stalling," cautioned his evil-tongued manager.

"Huh!" grunted the champion, "I can take all he has in dat left and never feel it. I'm goin' to open up 'im de last part of de next round."

The going rang for the second round.

Her Color Went Black. She Was Frightened To Death

Mrs. Waite, New Brighton, writes: "That terrible indigestion and gastric trouble, caused by constipation made my color go black. I was frightened and I feel your laxative saved my life. Every night now for prevention, I take a small box of Carter's Little Liver Pills. All druggists—25c and 75c red pills."

Donald caught a glimpse of Purell's face as he crept in the opposite corner. Such a look of vile hate shot from his one gleaming eye that Donald shivered.

The rough element began to boo Donald for his running tactics. Some fans felt that they are being cheated out of the price of admission unless they can witness the spectacle of two boxers slugging toe to toe until one goes down. Science counts for nothing with this small minority.

"Whadda ya think this is, a marriage?" "Powder-puff punch!" derided another.

Garrietta suddenly tore in, letting loose a terrific right that would have stopped the bolt right then if it had landed. From a clinch Donald looked to his corner. Andy went through the pantomime of shooting a straight left. Donald nodded.

"Powder-puff punch!" again shouted the disgruntled fan.

"Did ya hear that?" haled Garrietta, twisting his mouth into an aspid grin. "Yo can't hit hard enough to break an egg. I'm goin' to fix dose teeth for you now! He leered broadly as he tore after Donald, dislodging all of the belated left.

Donald stopped abruptly in his fight and shot a lightning left across to his partner's jaw. The champion saw it coming but too late to block it. He threw his body into reverse, rebelling the blow of a great deal of the force, with the weight of the athlete reeling back to the ropes, his head whirling and his knees wobbly.

With a roar the spectators came to their feet as one man. The Gung saved Garrietta.

The crowd gave Donald a deafening ovation as he walked to his corner. He looked for his friends and saw Douglas and Gills clustered in an embrace and dancing madly in the narrow space.

(To Be Continued.)

A LAUGHING BABY IS A GREAT JOY

What can give more joy in the home than a laughing, happy baby. The well-known mother, every baby who is a laughing baby, is a little one's nature to be happy.

Mothers, if your baby is cross, if he cries a great deal and has no attention seems to make him happy, give him a dose of Baby's Own Tablets and he will soon be well and ready to radiate that happy glow through the house again.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels and sweeten the stomach and thus banish constipation and indigestion; break up colic and simple fever and correct those troubles which accompany the cutting of teeth and in doing these things—and doing them well—they make baby happy and keep him happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

"And how do you get on with your wife?"

"It's a splendid working arrangement with her. In the forenoon she does what she wants, and in the afternoon I do what she wants."

The going rang for the second round.

"Easiest thing I've picked yet," chuckled the champion as he came to his corner.

"He may be stalling," cautioned his evil-tongued manager.

"Huh!" grunted the champion, "I can take all he has in dat left and never feel it. I'm goin' to open up 'im de last part of de next round."

The going rang for the second round.

Teeth and Health

Second Tip: The Canadian Dental Society has issued a booklet, "Teeth and Health," by The Mackintosh Dental Society.

TOOTH DECAY

You do not allow your child too many sweets lest they spoil his teeth, and, wisely, you do not let him know too much too early. But where the harm?

Now, as you have read, no doubt, he called tooth decay is a disease that is incited by bacteria. These microorganisms live in the gaps of setting up fermentative processes in leftover carbohydrates matter in the mouth, producing acids which attack the tooth substance to dissolve it in this manner these organisms gain access through the hard enamel covering.

You perhaps did not suspect the presence of bacteria in your mouth, did you? Yet, a noted authority states that more than a hundred different species of bacteria undoubtedly are isolated from a single mouth at one time or another.

Now, of course it is neither practicable nor possible to cut off the carbohydrate food supply, nor to rid the mouth of bacteria for any length of time.

However, nature herself is not unhelpful against the situation. For the acid formed is so a rube taken by the saliva and dissipated before it can do any harm, excepting where it can be undisturbed as in the case of a cavity, between the particles that adhere to the tooth when proper mouth toilet is not observed.

But you must do your part by brushing your teeth with a toothbrush that has soft bristles and a liberal supply of these is to create a condition that can not invite bacteria to multiply. The proper mouth toilet is not the daily rule.

First Parachute Was Used By Frenchman

Successful Drop Made From Considerable Height In 1892

Unquestionably the parachute, nearly in its present shape, is as old as aerostatics. There is supposed to be a picture of one in Venice dating from 1617, and there is a narrative of a French amateur who, in the year 1770, contrived to the effect that a mountaineer at the royal court climbed to the top of a tall bamboo and jumped off with two umbrellas to support him. Very likely this is true.

Shortly after the Montgolfier affair, the French aeronaut Blanchard seems to have made the first parachute experiment in connection with a balloon, but instead of trusting himself to the apparatus he attached his dog.

Probably because the parachute had been used by a Frenchman, it was and was thus much too large for the dog, instead of dropping when released, it went up considerably higher than the balloon, then at about 500 feet. After a time it came back down near the balloon and the dog began to bark at the great height of the balloon. At least, that's the story that comes to us. Finally Blanchard reached the ground by the gradual descent of his balloon and a little later the dog landed unhurt.

This successful experiment doubtless greatly stimulated the interest for presently various forms of parachutes were suggested, some of which were actually constructed, and among them that of the late and wonderful arrangements. One of these promptly folded up when released and resulted in the death of its inventor. After his it appears the designers returned to the original umbrella form.

The first successful drop from a balloon at any considerable height appears to be that of the Frenchman, Garnerin, who staged a performance at Paris in 1802. Garnerin cut himself loose at 1,200 feet and luckily managed to land safe and sound.

The Middle Course

During his visit to a village school a diocesan inspector of religious knowledge put this question to a class of children: "What color were the good people white and all the bad people black, what color would you be?"

Scouts answered "White" and others "Black." But little Mary replied: "Please, sir, I would be stranky!"

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Low's Corn Remover.

Mistress: "I see that another soldier has called for you, Mary. I thought you had only one sweet heart!"

Cook: "Oh, no, mum; two. You see, one's regular and the other's a reserve."

Minna's Lament for sparrows

"Did you hear about the defection of Skinner's tomstons?"

"No, what was it?"

"Someone added the word 'friends' to the epitaph?"

"What was the epitaph?"

"He did his best."

Trying To Eliminate Hazards Of Submarines

U.S. Navy Will Make Test Of Rescue Apparatus

Stirred by undersea craft disasters that have taken the lives of scores of American officers and men, the navy is making strenuous efforts to eliminate the hazards of submarine by devising and perfecting rescue apparatus.

Many experiments are being made and plans carried out for exhaustive tests to learn what happens when a submarine is stricken below surface. A man has survived a submarine accident wherein the craft was totally disabled and flooded while under water, and none has been able to tell just what occurs under such conditions.

In addition to laboratory experiments, the bulk of the submarine S-4, which took 40 men to their deaths after she was rammed by the Coast Guard destroyer, Paulding, off Provincetown, Mass., December 17, 1927 will be used in rigorous tests off Cape Charles, Va., in October. These tests are to be conducted by Lieut. C. B. Mousen, submarine expert and diver.

Attempts will be made to learn conditions that exist during the wreckage of modern craft and devise methods of counteracting and preventing them. Naval divers will be placed beside the hull which will be sunk and flooded. They will then surface through hatches and come to the surface by using the navy's new breathing device, "the lung," and other rescue apparatus developed during the last few months.

The singing Minnow was a statue in Egypt which gave out musical notes when the sun rose in the morning and as it set at night. After the statue was tipped over it no longer sang.

Excited Person (complaining to postmaster): "And if I don't get better service, I shall give my postal business to someone else."

Headache? Believe with Minard's Liniment.

"Have you anything to say, prisoner, before sentence is passed upon you?"

"No, your honor, except that it takes very little to please me."

There's been a revolution in the science of battery building—Eveready has found a way to give you more battery for your money than you ever bought before!

The new Eveready principle can be understood by anyone. It simply gives you more current-making elements by packing flat cells like crackers in a box, instead of using many round cells with waste space between.

You actually get the equivalent of a much bigger battery and, of course, it takes much longer to use. That's why you should buy Eveready Layerbatts and save money. Now selling at new low prices. Ask your dealer.

CHAMPION

ALBERTA

Miss Fleming, of the school staff, spent the week-end in Calgary.

P. M. Watts, manager of the pool elevator, here, was operated on for appendicitis at Calgary last Saturday and is reported to be doing as well as possible under the circumstances. Mrs. Watts accompanied him to Calgary.

Walter Stein has been succeeded as assistant in the Champion Meat Market by Roy Lohm. While employed here "Scotty" made many friends who will miss him. His successor is well known here and had previously filled his position in the Meat Market for some months.

A new garage has been built at the parsonage during the week under the supervision of J. W. Cain. A large gang of men were employed at times, in fact it was rather hard to see the garage at times owing to the number of assistant carpenters. Most of these, however, dropped out before the job was done.

Repairs to the Pioneer elevator, which had developed a stunt somewhat on the lines of the leaning tower of Pisa, were in progress during the week, sufficient care having been secured to remove the bulk of the weight from the building. The elevator will resume business practically at once.

Dean Smith and Mrs. Harry Smith left for Calgary on Saturday on receipt of the news that little Hazel Smith had taken a bad spell. The patient rallied later, much to the relief of her relatives and friends.

Everything a man wears will be on sale Nov. 1st at Campbell's.

Joe Mark is attending the University at Edmonton.
